

It is important to protect our Earth because Earth gives beautiful things, the things we never are thinking of. Earth gives us beautiful moments all the time through night and morning. Protecting the Earth may be critical and we all as humans should work together to make the world a better place to live in. This is why humanity still exists, because of the beautiful planet. Thanks to Earth, our humanity still believes in beauty, still exists to this moment and forever on. We as humans should make the planet better by cleaning after ourselves instead of throwing away trash—that only makes our only home become a disaster. Humanity observed this beautiful planet, and the more we don't know about this innocent and peaceful world we live in. But some humans tend to make our only world worse. But I'm planning to be grateful every day, because of this most intelligent world we live in. As a human, I'm happy and grateful for everything.
